Does this trading idea hold up?

Alpha Auditor turns a market hypothesis into a testable rule, a historical verdict and a notebook a researcher can rerun.

RESEARCH HYPOTHESIS

“Does SPY rebound after a sharp drop?”

Audit output

```
Strategy specification
Out-of-sample results
Executable notebook
```

Make the trading rule explicit.

A researcher can confirm how the app interpreted an idea before running the test.

Research hypothesis

> “I think the S&P 500 tends to recover the day after falling more than 2%.”

`Researcher input`

Saved SPY audit

Parsed specification

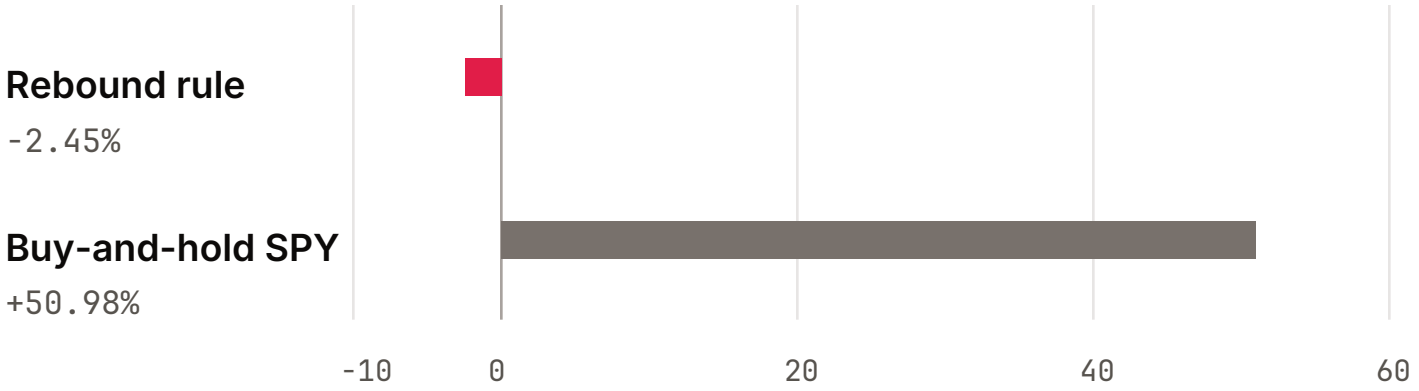
Asset	`SPY`
Drop threshold	`2.0%`
Holding period	`1 trading day`
Entry timing	`Next open`

The app inferred the entry timing.

The rebound rule lost money after costs.

SPY one-day rebound strategy / Held-out period, 30 Dec 2021 to 31 Dec 2025

Cumulative return (%)



Source / audit-9653322ee6

What the audit found

Across 34 held-out trades, the rule lost 2.45% net.

The reported backtest assumes 5 bps commission and 5 bps slippage per side.

Colour carries meaning.

Keep the pitch on the light theme. Use the dark theme for a divider or closing slide.

Canvas
#FAFAF9

Card
#FFFFFF

Border
#E7E5E4

Body
#57534E

Ink
#0C0A09

Emerald
#059669

Diagnostic

Caution
#D97706

Loss / risk
#E11D48

Dark theme

Canvas	#0C0A09
Panel	#141210
Accent	#10B981

Use emerald for the strategy or active step. Label every warning and loss.

Type sets the reading order.

Inter carries the argument. JetBrains Mono identifies quantities, units and run IDs.

TYPE ON A 960 × 540 PAGE

Test the rule.

Inter SemiBold / 36–56 pt titles

Compare returns after costs.

Inter Regular / 16–19 pt body

`34 trades  -2.45%`

JetBrains Mono / figures and identifiers

Slide geometry

16:9 canvas

48 pt margins

24 pt gutter

Use a 1 pt stone border and 6–12 pt corners.

Give each slide one headline and one exhibit.

Keep the logo and wordmark together.

Brief for Canva

Use pages 1–3 as pitch templates and pages 4–5 as the visual reference.

PROMPT

Create a 16:9 hackathon pitch deck for Alpha Auditor. Open with the question “Does this trading idea hold up?” Show the SPY hypothesis, the confirmed rule and its held-out result. Close by inviting the judges to rerun the notebook.

Match the supplied logo, stone canvas, white cards and emerald accent. Use Inter for prose and JetBrains Mono for figures. Give each chart a unit, date range and source. Use the supplied SPY figures exactly. Put detailed calculations in the notebook.
